

Environment and safety policy rev. 02 dated 12.11.2018

D-KTC Fluid Control S.r.l. has been guiding its activity from the beginning in order to meet the needs and expectations of the interested parties relevant to environment and occupational safety with regard to the aim of this certification:

planning, assembly and hydrodynamic testing (through the use of test bench with oleo-dynamic press) of strainers and pressure equipment

D-KTC Fluid Control S.r.l. is committed to scrupulously comply with current rules and any compliance obligation that the Management assumes as its own regulation, particularly obtaining the best conditions possible relevant to Occupational health and safety (OHS) and acting by fulfilling the environmental protection requirements that are so important within our decency, with reference to the principles of pollution prevention and environment protection.

To this end D-KTC Fluid Control S.r.l. wishes to pursue with the achievement of the following strategical objectives:

1. promote a continuous improvement of health and safety protection by ensuring to the staff a safe workplace, whether they are direct or indirect employees, suppliers or customers;
2. carry out its working activities by committing itself to prevent accidents and professional illnesses;
3. with reference to the chemical substances necessary to the production and maintenance of its factory, choose, whenever possible, the less dangerous ones for persons and environment, scrupulously verifying their consumption and managing them so that to prevent both workers exposition and discharges or spillages harmful to the environment;
4. make every reasonable effort to limit the production of wastes, with particular reference to the dangerous ones, starting from the source, in every working phase, and encourage a waste management according to a ranking of priorities that privileges, whenever possible, the reuse, recycling and recovery of the raw materials, as well as the combustion with the consequent energy production;
5. monitor and assess in an appropriate way the environmental and OHS efficiency and constantly improve it, by avoiding unnecessary wastes and consumptions of energy and natural resources, including water;
6. ensure the involvement of the management in the environmental and OHS policy and objectives of the company; submit to periodical review the policy and the application of the environment and OHS system in order to assess its correctness and efficiency for a continuous improvement;
7. ensure that the staff is made aware of the environmental and OHS commitment of D-KTC Fluid Control S.r.l., involved in their fulfilment, instructed and trained to adopt an attitude consistent with these commitments;
8. ensure the adoption of a correct environmental attitude by the suppliers and the companies that work on behalf of the organization, in line with the environmental practices and procedures of the organization;
9. implement the best emergency prevention and control techniques;
10. establish appropriate control and audit methods of the environmental and OHS management;
11. pursue an open and constructive attitude towards the public, users, public authorities and other involved parties.

This policy must be communicated to all the persons who work for D-KTC Fluid Control S.r.l. or on behalf of it. It is available to the employees on the company message board, to the public on the website www.dktcfluidcontrol.com/quality-and-certifications/ and to anyone who requests it.
